Education

University of Central Punjab

Lahore, Pakistan

Bachelor of Science in Computer Science

2022 - 2026, CGPA: 3.46

Projects

Recruiter: Agentic AI Driven Recruitment System (FYP) | [Live Link](#)

Recruiter is an Agentic AI based recruitment platform that automates the hiring process using multiple AI agents working together, replacing slow, manual, and often biased traditional recruitment. Built recruiter and candidate interfaces using React.js, Tailwind CSS, integrated with a FastAPI backend over secure REST APIs with JWT + OTP authentication. Implemented AI-driven candidate-job matching using vector embeddings (Pinecone) and PostgreSQL for structured data. Integrated OpenAI API for resume parsing, personalized candidate messaging, and explainable AI-generated shortlisting decisions. Contributed to full system documentation and UML diagrams, following a layered service-oriented architecture.

Personal Portfolio | [Live Link](#)

Designed and developed a fully responsive personal portfolio website using React.js and Tailwind CSS. Showcased technical skills, projects, certifications, and academic achievements through a clean interface. Added smooth navigation and interactive UI elements for improved accessibility and presentation.

Food Ordering Website | [Live Link](#)

Developed a food ordering application with an intuitive interface for browsing menu items and placing orders. Implemented secure user authentication, shopping cart management, and a streamlined checkout workflow. Designed reusable React components with Tailwind CSS to ensure consistent UI and mobile responsiveness.

Experience

MERN Stack Development Intern U DEVS, Lahore (Remote)

Dec 2025 - Feb 2026

ECommerce Website | [Live Link](#)

Engineered a responsive e-commerce web application using React.js and Tailwind CSS, delivering a modern and intuitive shopping experience. Implemented shopping cart functionality to enhance user interaction. products, order and customer dashboards. Integrated reusable React components and responsive layouts to ensure seamless performance across desktop and mobile devices.
